

ADDENDUM #1

PROJECT: Moving Montrose Forward 2021 Street Maintenance
BID NO: 21-013
FROM: Ryan Cushenan
DATE: March 22, 2021

Questions and Answers

1. *Does the patching work under this contract need to be performed as a continuous progression once work starts or may there be gaps in the work?*

Answer: Patching work may start and stop throughout construction so long as project milestone dates are met and asphalt patches are placed within 7 calendar days of existing asphalt removal. It is understood by the City of Montrose that this project may be used as filler work for asphalt crews in the area and, as a result, may include multiple mobilizations.

Clarifications and Additions

1. None this addendum

Plan Revisions

1. Following consultation with potential patching and slurry seal contractors, the City has elected to split the patching and slurry seal elements of this project into two separate projects with two separate, individual contracts. The slurry seal contract will include the slurry seal scope of work (incl. design, surface prep, placement, cleanup, slurry traffic control, and slurry bonding). The patching project will include all remaining elements of the project. Updated bid forms, separated out for each project, are included on the City's purchasing website. Please use one of the updated bid forms (either patching or slurry) for submission of your bid.

For the individual patching contract, it will be necessary to complete patching within the slurry seal area prior to slurry mobilization. As a result, a milestone date for completion of patching within the slurry area is hereby added for May 28, 2021. Slurry work will also not become available until this patching is complete by others, May 28, 2021 at the latest.

For bidding purposes on the individual patching contract, bid the project assuming all scoped items will be completed. If necessary to reduce project scope due to budget constraints, updated costs for mobilization, traffic control, and bonding would be negotiated on a case by case basis with the low bidder.
