

ADDENDUM #4

PROJECT: Cerise Park Waterline Bore Project
BID NO: 21-018
FROM: Scott Murphy
DATE: June 24, 2021

Questions and Answers

1. *Regarding "Addendum 2 Plan Revisions 1&2, and the extra required materials. Will the City consider an extension to the bid due date?"*

Answer: The City would like to hold the bid opening date the same. Given City Council schedules, extension of the bid date by even one day would delay notice of award approximately 3 weeks. For the project approach narration added in Addendum Number 2, the intent is a quick narrative discussing the equipment to be used, approach for fine tuning design (if modifying), data collection, reamers and circulation methodologies, etc. This was not intended to be much more than a few paragraphs.

2. *Now presented as design/build, and pursuant to addendum 3 Q&A number 4. Will this impact the line items on the bid form?*

Answer: The bid form is intended to remain unchanged. Please incorporate any anticipated design or pre-construction field work/data collection costs into the established bid items on the bid form.

3. *Will the City provide survey & construction staking?*

Answer: Surveying and staking to be provided by the City is outlined on the general note sheet. If contractor intends to modify the vertical alignment, the contractor and City would work together to incorporate the new design into our drawing and can provide survey layout as outlined in the plans.

4. *If required and agreed to under contract, would the contractor be granted access to complete the geo-technical investigation prior to October 1?*

Answer: Yes, the contractor may have full access to the project site at any time for pre-construction activities.

5. *Would the City consider having a mandatory pre-bid conference to address concerns for qualified contractors?*

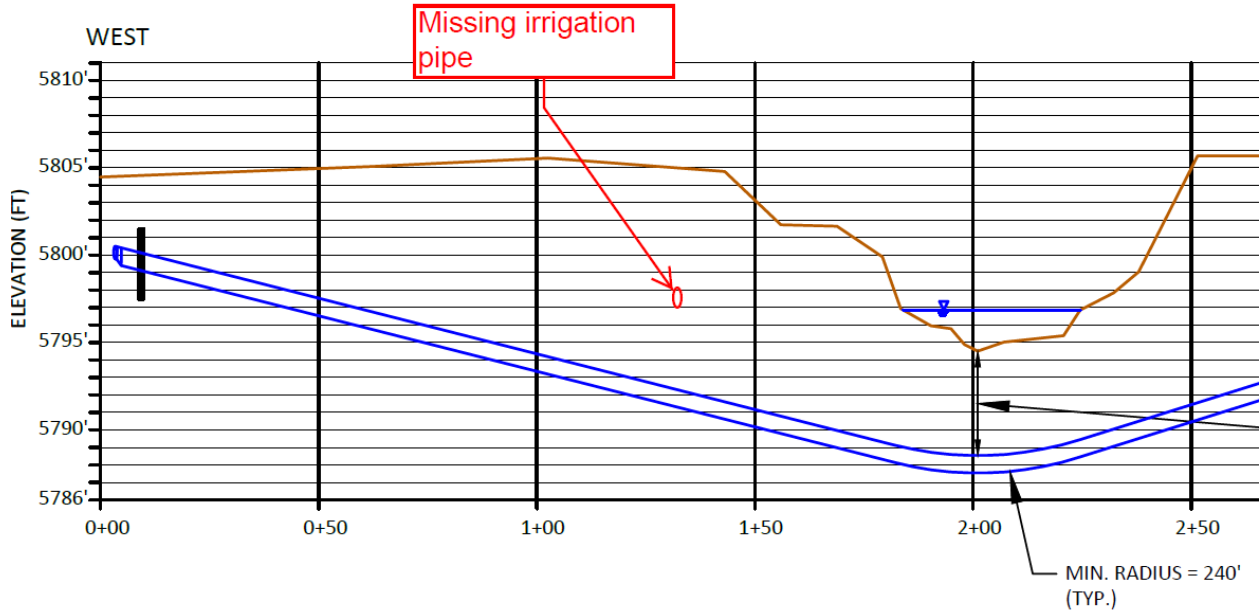

Answer: At this stage, the City does not feel enough time is available for a pre-bid conference. However, we remain available for any outstanding questions you may have up to the question deadline date.

Clarifications and Additions

1. None this addendum

Plan Revisions

1. A 12" diameter irrigation line is present in the bore profile that was missed in the initial survey. This is shown in an excerpt of the profile drawing below:

Acknowledgement in Receipt of Addendum

FIRM NAME: _____
